

DOT District Safety Certification Courses

<p>Roads and Bridges Maintenance Safety Workshop: Discusses the overall safety plan mission. Introduces the major components of a successful safety plan, how most accidents can be avoided by applying tested safety and loss control strategies.</p>	
<p>Trailer and Load Securement Safety Workshop: Designed specifically for municipal public works, parks, streets/roads, water, waste water, distribution/collection and/or storm water utility workers or any other city employees who load, haul and unload mobile equipment and other objects on to trucks and/or trailers.</p>	
<p>Rights of Way Mowing and Maintenance Safety: Program is designed for streets, roads, parks maintenance and/or transportation department employees, foremen or supervisors who maintain city/county or special district rights-of-way, infrastructure and other outdoor or roadside facilities.</p>	
<p>Chainsaw (Tree Work) Safety: Designed specifically for municipal DOT District, streets/roads, parks, water utility and/or other city or county employees who engage in tree work, are exposed to common tree work hazards and the risks associated with tree work machines and tools.</p>	
<p>DOT District and Transportation Chemical Safety: A total chemical management approach is applied referencing GHS, Federal HazCom Standard 1910 Subpart H and 1910.120 requiring specific management practices, the compilation of a chemical inventory and collection and indexing of safety data sheets (SDS).</p>	
<p>Signal, Lighting and Sign Fall Protection Systems: Any/all portable ladder, fixed ladder and/or arial reach equipment users. Also included would be building maintenance personnel, water, waste water and power utility plant operators and mechanics, public works parks or streets/roads workers and other public agency employees who work in elevated areas or near drop-offs. .</p>	
<p>Heavy Equipment: Classroom and Hands-on!</p>	
<p>DOT District Vehicle Operations: Designed specifically for municipal DOT District, water or waste water utility workers and all other city, county or special district employees not in public safety divisions. This program is for good drivers as well as drivers in need of improvement. New and seasoned drivers enjoy the course!</p>	
<p>DOT District Storm Preparations: Discusses department level preparedness and reviews list of activities performed on a calendar basis and on a time line basis once an emergency is declared. Detailed activities include items that are critical as storms approach, pass over and exit the community. Many additional activities are detailed related to initiating and completing the recovery process.</p>	
<p>Rights of Way Excavating Safety (Comp. Person): Designed specifically for municipal water, waste water, storm water utility and DOT District employees. Identifies and addresses common excavating hazards and details protective measures and safe work practices for all phases of the excavating job.</p>	
<p>Signal, Lighting and Sign Electrical Safety: General Electrical Maintenance Safety: Combines the principles of electrical safety, lock-out/tag-out, worksite safety engineering, safe work practices and use of protective devices/products, special clothing and personal protective equipment.</p>	
<p>Confined Space Entry: Designed for municipal storm water employees. Identifies and addresses common DOT District permit required confined space situations rarely covered by other programs. Details safe work practices for most types of municipal confined space entry situations.</p>
